OUR POWERFUL FEATURES ...

User Define Field (UDF)

- ◆ Users are allowed to create any additional fields based on creativity and drag any fields from the maintenance and transaction screen

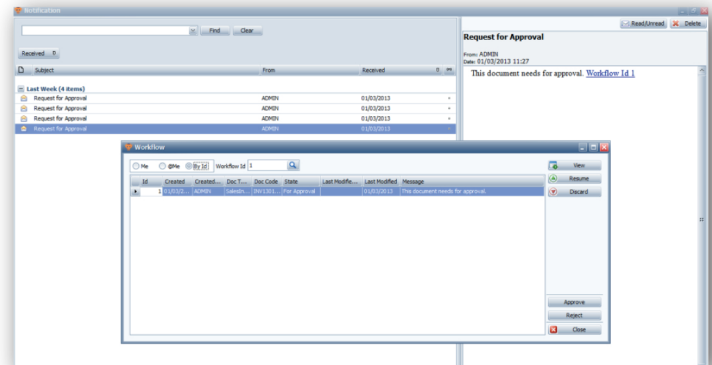

Google Map

- ◆ Print out the Google Map together with your Delivery Order.

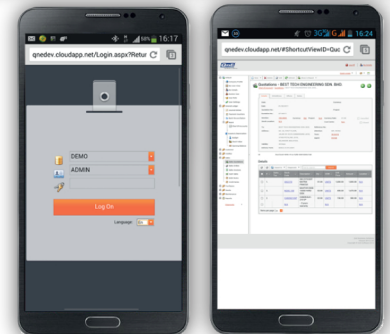

Notification Screen - Notification Screen for Request Approval / Review

- ◆ Should users exceed their credit limit when issuing a business invoice, they can still save it and later request for approval from their credit officers upon system login. Credit officers can also be rest assured that they will never miss any important approval requests again –our system will automatically send notifications for all pending approval requests.

Cloud Computing Technology

- ◆ It offers an option for users to subscribe to the web browser interface.
- ◆ It allows users to access their accounting system anytime and anywhere
- ◆ Users can instantly customize the report layout and publish it to their web interface.

A GST Accounting Software that do not require you to have much Accounting and GST Knowledge.
