

## MULTI CHAIN MANAGEMENT SYSTEM

**Hugely Powerful,  
Enormously Efficient**

## WHAT IS DYNAMOD?

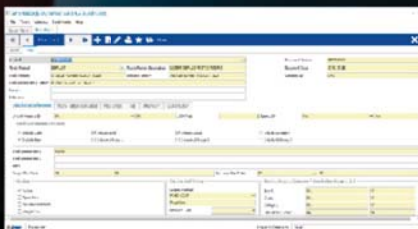

DynaMod is a next-generation multi-chain management solutions with seamless POS, inventory, accounting & retail integrate-able systems. With 9 magnificent modules & more than 300+ features, it is an enormous evolution to its pre-successor Smart SQL hosting 12,000 clients. Now re-crafted with multi level database architecture, online offline technology, BI tools and touch UI application, DynaMod is more powerful, faster and greater to elevates business performance instantly. Good for single store and ever ready for future expansion to chain or franchise stores.

## HOW DOES IT WORKS?

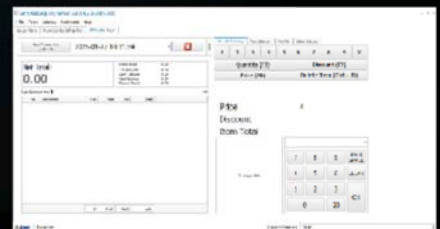

- Macroscopic architecture: multi stores, companies & regional
- Control or flexible: manage stock, price, promotions & more
- Quick flow: navigation, access & data process
- Seamless link: modules & 3rd party solutions
- Business scalable: according to size & budget
- Business on & on: online or offline Duo mode
- Powerful data: customize any analysis

**Promotion plans** in 8 types & are viewable in a calendar-like format.

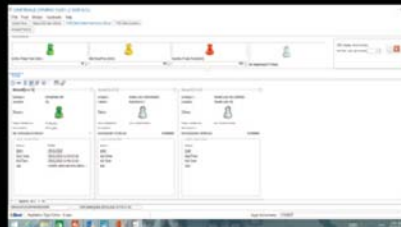

**Matrix functions and pre-defined templates** for easy stock checks and orders.

**POS settings simulation** as a test-run prior to enabling it to live.

**Centralized voucher management** that allows users to check on voucher configuration, issuance and redemption.

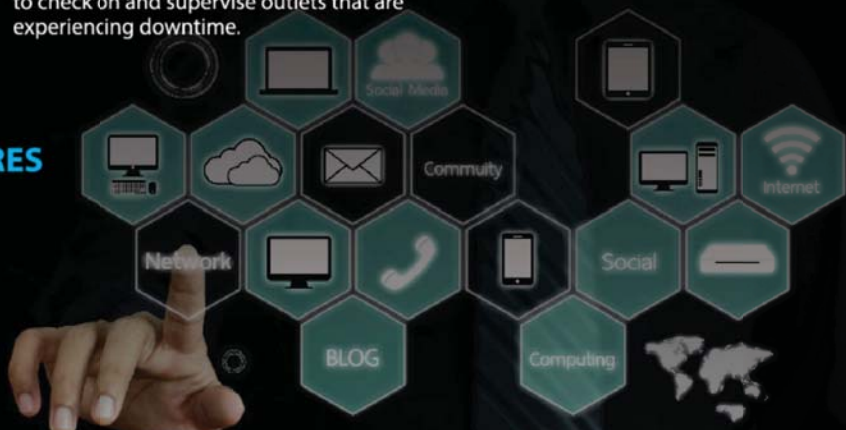

**Connection** that allows outlet managers to check on and supervise outlets that are experiencing downtime.

**Sales figures** are updated in real-time.
